

# Training Day 4 Report

## HTML Lists: -

An HTML list is a record of related information used to display the data or any information on web pages in the ordered or unordered form.

There are three basic HTML lists: -

- Unordered List
- Ordered List
- Description List

## **HTML Unordered List: -**

The unordered list items are marked with bullets. It is also known as bulleted lists. An unordered list starts with the **<ul> tag**. Each list item starts with the **<li> tag**.

Unordered list bullets are of various types

- Square
- Circle
- Disc

## **HTML Ordered List: -**

In an ordered list, all list items are marked with numbers by default. An ordered list starts with the **<ol> tag**. Each list item starts with the **<li> tag**.

### Attributes of ordered list

- **Reversed:** - It defines that order will be descending.
- **Start:** - Defines number or alphabet from which order will start.
- **Type:** - It defines that which type of order should list follow whether numeric , alphabetic or roman numbers.

## **HTML Description List: -**

Description list is a list of terms, with a description of each term. The `<dl>` tag defines the description list, the `<dt>` tag defines the term name, and the `<dd>` tag describes each term.
